Shrubs

	Size	10	25
Salix Nana Purpurea	18/24"	\$2.25	\$4.75
(Blue Willow) A dwarf bush that makes a distinctive hedge. Foliage is unusual bluish gray with a tinge of green. Withstands extreme cold weather.			
Kolkwitzia (Beauty Bush)	18/24"	3.00	6.75
(Beauty Bush) A glorious fountain-shaped plant covered with delicate pink, fragrant flowers in late May and June. Branches are gracefully arched. A rapid grower, 8 to 10 feet in height and diameter.			
French Pussy Willow	18/24"	3.00	6.75
Not the wild Pussy Willow but a fine cultivated French variety. Enjoy these dainty silvery pink flowers every winter. A beautiful round shrub in summer or use them for tall screens or backgrounds			
Russian Olive	2/3'	2.50	5.50
A very hardy, small tree with small, olive-like fruits and silvery foliage. Fragrant flowers in June; silvery and yellow fruit.			
American Bittersweet	12/24"	3.00	6.75
A native hardy vine that climbs by twining. Very vigorous and easy to grow. Glossy leaves turning bright yellow in fall. The big, showy clusters of crimson fruit with orange-yellow coat are widely used for indoor winter decoration.			
Smoke Tree	12/18"	2.50	5.50
Large, loose panicles of flowers with spreading hairs that give a smokey effect. A bushy shrub blooming in early summer. In fall the foliage turns to red, yellow and brown.			
Spirea Van Houtte	18/24"	2.50	5.50
Long, graceful white sprays in May and June. Used as specimens and in informal hedges. Hardy and adaptable.			
Snowberry White	18/24"	3.00	6.75
Bell-shaped, pinkish flowers followed by waxy white berries in autumn. A small, bushy shrub. Does well in partial shade.			
Magnolia Soulangeana	18/24"	10.00	22.50
A beautiful tree that grows to 20 feet or more in height. Widely planted for its really gorgeous 4-inch flowers that open in early spring just before the leaves.			

NURISH

Miracle

LIQUID PLANT FOOD

For

Flowers - Shrubs - Trees - Grass

20% Nitrogen — 20% Phosphorus — 20% Potassium

NURISH Gives Plants a Balanced Diet

NURISH is a high concentrate formula based on latest scientific findings—contains a 20-20-20 proportion of the major plant foods **Nitrogen, Phosphorus, Potassium**, plus vital minor elements **Boron, Manganese, Copper** and **Zinc**. Nurish is the result of an extensive study of plant's nutritional requirements and the chemistry of liquid feeding. Because food provided in solution is absorbed immediately, nutrient elements can be proportioned in accordance with actual plant needs. With NURISH your plants get enough of each element.

Well-fed Plants Resist Disease and Blight

Plants, like humans, resist disease better when well nourished. Feed plants with NURISH and you'll have less worry with other garden problems—weeds, insects, fungi, blight, etc.

Safe, Easy To Use — No Waste, No Mess

When dissolved in water as directed, NURISH cannot "burn" tender roots or harm even the most delicate plants. You can't make a mistake about the strength of your solution—NURISH is packeted in accurately, pre-measured, moisture-proof foil packets, each containing the proper amount for 2 gallons. You simply break open a $\frac{3}{4}$ -ounce packet and pour contents into two gallons of water. Nothing to measure—no loss through spilling—just stir 2 or 3 times and chemicals are thoroughly dissolved in a matter of seconds. NURISH may be poured on soil from a pail, sprayed directly on plants, or applied with garden hose. Full directions on When To Use and How to Use will be sent with each package of NURISH.
